There, you're alone and you must destroy the notorious gangster. It is worth mentioning that the weapon only use enemies while using a knife to bring them a sudden and silent death. No one can be creative enough to think of the same scenario in the real world. yes, maybe he's just going to present it in a sense that you're not just thinking about in the game. And Hunter Assassin will take you to that world. It's a quiet but deadly world. Plot Hunter Assassin about a large construction site, where the gang runs. This is usually an oversized place with wooden walls and barrels arranged in some kind of maze. Your enemy is extremely crowded and always has a gun in his hand, he can take down any intruders. As a lone assassin, we will act only in the dark, where dark and hidden corners require advantage to defeat enemies. But not only that, if you do not want to be detected and shot, the death of the enemy should be carried out completely silently. The task is extremely difficult, but are you sure with your knife? It's no exaggeration to say that you're going to be an invisible assassin in the invisible assassin Hunter Assassin. Basically, nothing is too difficult to kill at least, only undetected. The important thing is to take money from the darkness of the night and the emptiness of the enemy and destroy them. To win, you want to get shot or not lose all lifePoint. Whenever you are discovered, a LifePoint is deducted and you lose when it reaches 0. However, it does not mean that you have to stay in all LifePoint. At some difficult levels, using lifePoint in a smart way will help you. Every time you defeat an enemy, you'll get diamonds. This unit helps you buy many things in-game, including learning skills and unlocking new assassins. Then to defeat many difficult levels, new assassins with new skills are essential. Relying on tactics, you will use a personality of one with high speed, or good endurance. But I feel like speed continues to be the most important thing. Which one does the assassin like? Leave the comment below this text. The character system is extremely attractive. Only an impressive look, your strength and speed are also greatly improved according to the first character. In terms of game play, Hunter Assassin is a The action game, which, you want to use thinking and patience to kill enemies. They need guns and flashlights. When someone comes to light of the flashlight, the gun fires automatically. What would you do with a knife in your hand? Cause deeds or fear of the enemy? Why am I saying this, because why should you unexpectedly bring down the enemy and then run away like the wind? What's more afraid of a sudden and painful death? Extremely simple controls will cause the right love of hunter Assassin from the primary game. But I don't think this game lacks the challenge. the problem lies in many different levels. And in fact, to a high extent, the difficulty at the top increases with the amount of enemies and is easy to detect. Therefore, useful advice: kill lone enemies to open the way and they will remove many enemies directly instead of an equivalent place. But beware, death is a kind of wind! Graphics As an easy game, Hunter Assassin has not very high graphic requirements. The background is usually enemy space with many winding corners. it's quite monotonous, sometimes players can feel boring. The only thing that's changed is probably the characters and the enemies. But sometimes joy comes from just things. Details.
